Heineken – Swing your moods

- This is a concept design for an International design contest by Heineken.
- The concept is an extra attachment to the bottle which has the flavour.
- As there is no alcohol in the attachment, it can be advertised directly in many countries where advertising alcohol directly is not allowed.
- This concept has won the first prize.

Kalya – A Multi Fuel Stove

- A single stove which can use multiple fuels and can be used according to the fuel availability and affordability.
- This stove is designed for people from the lower income groups of under-developed and developing nations who do not have a proper access or cannot afford cleaner cooking fuels.
- This is a 3rd Prize winner in Cook stove design contest organized by Center for Sustainable Global Enterprise at Cornell University (USA) in 2013.
